

SMART DRIVE 90™

90 PIECE GUNSMITHING KIT WITH FORCE ASSIST™ LED BIT DRIVER.

Smart Drive 90 is an advanced gunsmithing driver set. The main driver features a magnetic bit holder, rubber grip, jeweler's spin top & 360° LED light. It partners with the small "close quarters" driver to create Force Assist™. Force Assist is a proprietary system that helps users to loosen frozen-in-place screws as well as precisely tighten screws.

WHY GUN BITS ARE BETTER THAN HARDWARE BITS

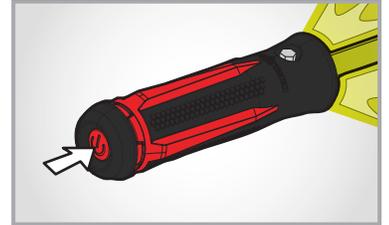

STANDARD SHAPE

Common hardware bits are tapered & put all of the torque on the top corners of the screw slot. This commonly results in deformed screws and slippage that gouges and damages your gun.

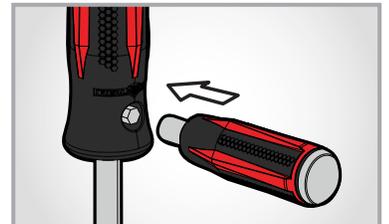

HOLLOW GROUND

Gun bits are hollow ground and come in different blade thickness and widths to perfectly match gun screw slots from top to bottom. This distributes force on the full bearing surface of the screw slot walls and greatly reduces slippage and marring.

Powerful COB LED light provides 360° no-shadow illumination

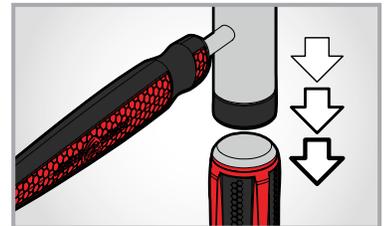

Small bit driver inserts into main driver shaft to provide improved leverage for loosening and tightening screws

87 STANDARD & METRIC BLACK OXIDE COATED GUN BITS

Comprehensive set of premium S2 steel gun bits. Engineered to precisely fit gun hardware. Designed to fail before damaging small, fragile screws and fasteners. Duplicates of most commonly used slotted bits.
